FAX-L170

Meet the new Canon FAX-L170. Combining fast laser printing, reliable fax performance, and ultra-low energy consumption, this compact device promises feature-rich functionality and incredible cost-savings. Set your expectations higher than ever before with the Canon FAX-L170.

PRINT AND COPY PRODUCTIVITY

Not just a fax machine, the FAX-L170 is also a fast 18 pages-per-minute (ppm) desktop printer. Ultra-Fast Rendering (UFR II LT) printing language and Canon's unique load balancing architecture reduces reliance on device memory, while On-Demand Fixing technology ensures fast warm-up and recovery times.

Traditional Roller Fixing	On-Demand Fixing
<p>Heating entire roller surface results in longer warm-up time and higher power consumption</p>	<p>Heat transferred directly to fixing film reduces warm-up time and saves energy</p>

And with the 30-sheet Auto Document Feeder (ADF), users can also make copies of multi-page document originals at up-to 11.8 copies per minute (cpm).

EFFORTLESS EASE-OF-USE

An evenly-weighted handset integrates seamlessly with the device body, maintaining its unique compact shape. With a generous 5-line LCD display that also makes it easy to set up the device for the first time, the FAX-L170 is designed for user-friendly operation inside-out.

MINIMAL MAINTENANCE

The FAX-L170 is virtually maintenance-free, thanks to Canon's All-In-One Toner Cartridge 328.

USEFUL FAX FEATURES

Reliable fax performance is assured with 512-pages fax reception memory, and a 5-minute memory backup feature to prevent accidental data loss. 30-one-touch dials are also available for convenient access to frequent fax destinations.

YOUR PARTNER IN GREEN SAVINGS

The FAX-L170 can be relied on for great cost-savings even when left powered-on all-day. The device drops into Sleep Mode after a period of inactivity, consuming just 1.5W.

The device also complies with the EU RoHS* directive by eliminating hazardous substances such as mercury, cadmium, lead and hexavalent chromium.

*Restriction of the use of certain Hazardous Substances in electrical and electronic equipment

QUALITY TONER ENGINEERING

Adopting a spherical particle shape, MS-Toner achieves improvements in image processing performance, precise character and overall image quality. MS-Toner also improves melting performance, which assists On-Demand Fixing technology through the use of less heat and pressure.
